Flight and Fare Options

An option associated only at segment level, must be preceded with a slash (/): **Example**

FXDMAD/D12OCT/TD0900 /W2 LON

An option associated only at itinerary level can be preceded by either a single slash (/) or a double slash (//).

An option associated at both itinerary and segment level must be preceded by a double slash (//).

See **HE FXD** for further examples of options.

Option segment (S) itinerary (I) both (S,I)	Example	Explanation
Multi-city **S**	PAR,EDI,LON	Cities/Airports separated by comma
Airline (include/exclude) **S,I**	//ABA /A-KL,BA	Inc. at itinerary level Exc. at segment level
Flight category **S,I**	//FN /FD	Nonstop flights at itinerary Direct flights at segment
Connecting point **S**	/XATL,WAS /X-ORD	Include, max 2 Exclude, max 2
Time of Departure/Arrival **S**	/TD1500 /TA1200	Time of Departure Time of Arrival

Cabin **I**	//KC
	//KC,+
	//KC,*
		Mandatory cabin
		Recommended cabin
		Major cabin

Currency **I**	/R,FC-EUR	Currency conversion
Withhold/Add Taxes/Surcharges **I**	/R,WT /R,WQ /R,WT-XG-XQ /R,ET	Withhold (all) taxes Withhold Q surcharge Withhold specified taxes Exempt all taxes
Expanded parameters **I**	/R,*NAP /R,*NPE /R,*RF /R,*NR	No Advanced Purchase No Penalties Refundable No Restriction
Selling/Ticketing **I**	/R,YVR.LON	YVR selling, LON ticketing

Option Segment (S) Itinerary (I) Both (S,I)	Example	Explanation
Type of fares **I**	/R,UP /R,U006220	Unifares and published Corporate fares
Price To beat **I**	//PB15000000	Price to beat in point of sale currency

Passenger Types **I**	/RYTH
	/RYTH-STU
	//PAX/1/RMIL/1/RGVT
	
	//INF/1
		Single PTC for all pax
		Multiple PTC for all pax
		1 military and 1 government (others default ADT)
		one infant

Ticket-ability Pre-check **I**	/R,T-AA	Inc. validating carrier AA
Segment selection **S**	/S3-5	Search on segments 3, 4 and 5 of the PNR
Keep PNR connecting	//X	Keep same PNR connecting points
Alternate date **I**	//D3 //D-10	3 days later than PNR 10 days before than PNR
Disable PNR recommendation **I**	//NPR	Disable PNR best pricing

Amadeus
Master Pricer Expert

Quick Card

amaDEUS
Your technology partner

Introduction

Amadeus Master Pricer Expert is a shopping solution which provides you with the cheapest recommendations for your query. You can use it to search for available fares and you can use to either create a new booking or to replace the existing itinerary.

This quick card contains two scenarios that show you how to use Master Pricer Expert. It also explains how to associate Master Pricer Expert options at either segment or itinerary level, and lists the flight and fare options.

For more information about Master Pricer Expert and its options, enter **HE FXD** in the Amadeus Command Page.

Amadeus Master Pricer Expert in action

Here are two examples of how to use Master Pricer Expert entries with and without an active PNR.

Scenario 1: Without a PNR (standalone entry)

You are a travel agent in Miami. You want to book a flight for an adult passenger from Miami to Vancouver on November 12 and return on November 20. Use the following to find low fares for this itinerary:

For a return trip, enter:

FXDMIA/D12NOVYVR/D20NOVMIA

The following recommendations are displayed:

```
FXDMIA/D12NOVYVR/D20NOVMIA
30 GROUPS AND 50 RECOMMENDATIONS RETURNED FROM USD 528.26 TO 1538.24

---------- RECOMMENDATION 1 OF 1 IN GROUP 1 (USD 528.26)----------
   PTC       CUR            TAX          FARE BASIS
1 ADT     1 USD    528.26    107.26      VA14FN+TA14FS
   TOTAL   1 USD    528.26    107.26

1   CO1234  V  12NOV  MIA   IAH C  550P  745P   E0 739
    CO1562  V  12NOV  IAH C YVR M  905P  007A+1 E0 739  0917
2   UA 246  T  20NOV  YVR M ORD 1 1117A  513P   E0 320
    UA3751  T  20NOV  ORD 2 MIA   701P  1114P   E0 CR7  0857
>> FXS1 TO SELECT  >> FXZ1 TO BOOK  >> FXU1 TO BOOK AND CREATE TST
1 TICKETS ARE NON-REFUNDABLE
1 LAST TKT DTE27OCT11 - SEE ADV PURCHASE

---------- RECOMMENDATION 1 OF 2 IN GROUP 2 (USD 531.91)----------
   PTC       CUR            TAX          FARE BASIS
1 ADT     1 USD    531.91    108.91      QA00EQC1+
   TOTAL   1 USD    531.91    108.91

1   AA2419  Q  12NOV  MIA   DFW   725A  925A   E0 757
    AA1379  Q  12NOV  DFW D YVR M 1110A 120P   E0 757  0855
)>
```

Master Pricer Expert returns the list of recommendations in groups. Each set of recommendations in the same group shares the same price, tax, fare basis and booking code. The total fare is presented in brackets for all passengers at the top of each recommendation. The currency shown is the currency of the point of sale by default. Each recommendation displays Passenger Type Codes (PTC), the tax amount and flight details. You can view pricing appended messages such as refund, last ticketing date, and other related messages. Possible follow-up entries are also listed for each group.

Only the first recommendation is displayed for each group. To display all recommendations for one specific group, enter:

FXS and the recommendation number: **Example FXS2**

To book and price a recommendation from the FXD or FXS display, without storing a TST, enter:

FXZ and the recommendation number: **Example FXZ1**

To create a TST from the **FXD** or **FXS** display, enter:

FXU and the recommendation number: **Example FXU1**

Once the recommendation is booked and priced, you can request:

- The fare note with **FQN** Routing
- information with **FQR** Booking code
- information with **FQS** The ticket
- image with **FQQ**
- Flight information with **DO** from PNR display

Note: You can use the **MP** entries to return to a previous display. **Example MPFXD**

You can search seats and fares for several passengers at the same time by adding the number of passengers with the request: **Example** search travel recommendations for 4 passengers:

FXD4MIA/D20DECSFO/D27DECMIA

Alternatively, you can enter passenger names with the passenger type codes into the PNR. This way you don't need to specify the number of passengers or PTCs in the FXD query. The amount shown in brackets in the FXD and FXS displays is the total amount for the complete party. You can then complete your PNR when the recommendation has been booked, priced and a TST has been created.

Scenario 2: With an Active PNR

You need to search for cheaper recommendations for an itinerary already booked in a PNR and your customer would like to depart and return three days later than originally planned.
Simply retrieve the PNR and enter:

FXD to search for cheaper recommendations for the current itinerary or,

FXD//D3 to search for cheaper recommendations 3 days later.

Example

```
FXD//D3
17 GROUPS AND 50 RECOMMENDATIONS RETURNED FROM USD 349.10 TO 475.80

---------- BEST AVAIL. FARE FOR CURRENT PNR (USD 475.80)----------
   PTC       CUR            TAX          FARE BASIS
1 ADT     1 USD    475.80    73.01       SA14ERD1+
   TOTAL   1 USD    475.80    73.01

)>
```

The first recommendation shows the lowest (best) available fare for the current PNR itinerary.

The other recommendations are the cheapest for the same PNR itinerary for a departure 3 days later.

You can use **FXS** and the recommendation number to display all recommendations for one specific group.

You can use the following commands with the recommendation number to rebook with a proposed recommendation:

FXZ to rebook and price,
FXU to rebook and create the TST.
