New Lufthansa Route from Frankfurt to Montreal

Dear travel agency partner,

Lufthansa is set to further expand its offer from Frankfurt. Between 16 May and 12 October 2014 Lufthansa will launch a seasonal summer service to the Canadian City of Montreal. The non-stop flights will operate five times a week on Tuesday through Friday as well as on Sunday, using Airbus A340-300 and A330-300 aircraft in a Business and Economy Class configuration. Lufthansa already operates daily non-stop flights between Munich and Montreal. So beside LH Munich flight, together with Air Canada (AC), there are 12 weekly flights from Frankfurt to Montreal.

Due to the high level of demand, we will now be offering flights from our Frankfurt hub to Montreal during the summer peak season. We are delighted that this will mean even more flexibility and choice for our customers. Flight LH 478 is scheduled to depart from Frankfurt in the early afternoon and reach Montreal at 3.35 p.m. local time. This will enable passengers travelling through Montreal to connect to the network of Lufthansa's partner Air Canada. The return flight, LH 479 is set to depart Canada at 5.10 p.m. and arrive in Germany the next morning at 6.25.

In general, LH and AC will offer customers 62 weekly direct flights from Germany to Canada during summer 2014. Moreover, customer can enjoy different connection via one of these airports to other Canadian destinations.
