Prohibition on carriage of small vehicles powered by Lithium batteries

With immediate effect the carriage of small vehicles powered by lithium batteries is prohibited in both checked baggage and cabin baggage on all Qatar Airways flights. The restriction applies regardless of the watt-hour rating of the lithium battery in such devices.

Some examples of these small lithium battery powered vehicles are: Air-wheel, Solo-wheel, Hover-board, Mini-Segway, Balance wheel.

The prohibition is immediately applied due to concerns regarding the questionable quality of such small vehicles and potential fire hazard associated to the batteries and since the safety of our passengers and crew comes first.
