APIS for Passengers traveling to the USA

Dear Valued Partner,

In compliance with USA DHS/CBP requirements, APIS must be correctly updated in the PNR at the time of ticketing. The APIS for all passengers in the PNR must be as per the passengers' documents that will be used to enter the USA.

Additionally, as part of the requirement, passengers' email address and contact information in both USA and Iran must be to be updated in the PNR.

If a case of non compliance with the above procedure is found during pre-flight checks, the passenger will be denied boarding. The travel agency issuing the ticket will be responsible for any inconvenience to the passengers.

We look forward to your support to make your passengers' journey a pleasant experience.

Thank you
